

Laundry Soap Recipe

Ingredients for One Batch:

1 Bar Soap (any kind) I use Ivory most of the time

1 cup WASHING Soda (found in the laundry isle)

1 cup Borax (any kind)

Use only 1 TABLESPOON per load. I do decrease slightly for delicate loads or extra small loads and increase slightly for an extra-large load or an extra dirty load.

I will make a larger batch most times by increasing the ingredients times four.
